

Agile Development with JIRA Software

Issue Date	Version	Exam Validated for Product(s)	Description
1 September 2016	V1	JIRA Software	This is Version 1.

Exam topics are subject to change. Visit atlassian.com/certification to ensure you have the most up-to-date topics.

Exam Topics

Gather, Communicate and Iterate Requirements

- ☐ Identify differences in support levels of third party add-ons listed in the Atlassian Marketplace.
- ☐ Given business requirements, determine if JIRA will meet the requirements and/or if other Atlassian tools would need to be added in order to meet the requirements.
- ☐ Given a set of business requirements and current architecture, identify and/or justify JIRA project configuration requirements.
- ☐ Provided a scenario with a set of business requirements and current architecture, prioritize and/or reconcile JIRA project configuration requirements.

Configuring and using JIRA as a project administrator

- ☐ Translate business requirements into appropriate JQL queries.
- ☐ Translate business requirements into appropriate issue navigator configurations.
- ☐ Given a scenario, identify appropriate use of components.
- ☐ Given a scenario, identify appropriate use of versions.
- ☐ Given a scenario, assign individuals and/or groups to appropriate project roles.
- ☐ Recognize development terminology related to project links with Atlassian development tools.

Configuring JIRA Software

- ☐ Given a scenario, recognize the impacts of time tracking/estimating configurations on the Agile team.
- ☐ Given a scenario, determine the appropriate steps required to create and/or configure an Agile board for one or more teams.

Using JIRA Software to support Agile development teams

- ☐ Predict the impact of ranking and/or versions on epics and/or stories in JIRA Software.
- ☐ Compare and contrast different behaviors and characteristics of issue types on an Agile board.
- ☐ Given a scenario, recognize the impacts of modifications to an active sprint.
- ☐ Given a scenario, determine the most appropriate sprint configuration using one or more Agile boards.
- ☐ Compare and contrast release methods between Scrum and Kanban boards within JIRA Software.

Reporting with JIRA Software

- ☐ Use JIRA Software reporting functionality to inform estimation and/or commitment of work tasks.
- ☐ Given business requirements, determine relevant information for SDLC and appropriate custom report design using JIRA Software.
- ☐ Analyze JIRA Software reports to measure performance and report performance to the appropriate stakeholder(s).
